

AVAILABLE SERVICES

The following services are available through the Adult Head Injury (AHI) Program:

SERVICE COORDINATION

Service coordination is available free-of-charge to all individuals who are eligible for the program regardless of income. Individuals may contact an AHI Service Coordinator. Alternatively, physicians, family, friends, rehabilitation centers, service agencies, and support organizations may refer the individuals, with their permission.

Service coordination includes:

- Evaluation and assessment of needs;
- Information and education about the cause and effects of Traumatic Brain Injury (TBI) and preventing secondary conditions;
- Development of a service plan to meet the identified needs; and
- Assistance in locating and accessing resources and services, such as medical care, housing, counseling, transportation, rehabilitation, vocational training, and cognitive/behavioral training.

REHABILITATION SERVICES

Rehabilitation services listed below are available to individuals who are eligible for the service, whose income is 185% of Federal Poverty Guidelines or lower.

These services may be provided to eligible clients when necessary to facilitate the client's achievement of a long-term goal as indicated in the Special Health Care Needs (SHCN) Service Plan. The provision of rehabilitation services is subject to availability of funds, which are appropriated annually. All rehabilitation services must be prior authorized. Department of Health and Senior Services (DHSS) is payer of last resort. The AHI Service Coordinator will assist the client to apply for any other payment resources before submitting requests for use of program funds.
